In response to the Official Action mailed on July 30, 2002, please amend the above-identified application as follows:

IN THE ABSTRACT

Please amend the abstract to read as follows:

A component, such as a submersible motor, having a lubrication distribution system. The component includes an outer housing having a rotatable shaft disposed within the housing. The shaft is supported by one or more bearings and a lubricant is disposed within the housing. A conduit is provided for conducting a lubricant from the lubricant pump to desired locations, such as the one or more bearings.
